How to play it How to Download In this post you will understand everything well. PUBG Lite MOD APK FAQs PUBG Lite Mod Apk is a new mobile version Tencent Games and PUBG Corporation released. It’s been in beta testing for the past few months, and now it has finally gone live to download on Apkspure.com and the Website. This new app is about 10 MB smaller than the original Game, but it doesn’t have all of the features from the PC or Xbox versions of PUBG. This Game might not be your best option if you’re looking for an experience that feels as close to playing on a desktop computer. But if you’re looking for something lighter with fewer graphics and more control over how much data you spend on your phone while playing, then this could be perfect. Q 1. What are the system requirements for PUBG Lite? A 1. Android 4.4 or higher, 1 GB of RAM or more, and a screen resolution of 540 x 960 pixels. This can be changed in the settings menu to a higher resolution, but you will need an Android 7.0 phone or higher to do that. Q 2. What are the differences between PUBG PC and PUBG Lite? A 2. The comparison between PC and PUBG Lite is not clear-cut because they are very different games. The PUBG Lite version is a mobile app that allows you to play Tencent’s take on the original Game for free with microtransactions. Q 3. What kinds of devices can PUBG Lite be installed on? A 3. It’s been reported to work on various Android phones. You’ll need at least 1 GB of RAM to run this Game, and you can install it on your SD card if you have one. Q: Does PUBG Lite consume fewer device resources than the original PC version? A 4. Yes, but whether or not the experience is better depends on what kind of phone you’re using. PUBG Lite requires approximately 1 GB of RAM and 16 MB of storage space, whereas PUBG PC requires 3 GB and 300MB. Conclusion I hope you now understand what PUBG Lite Mod Apk Download for Android and IOS is.
